CAMELLIA LINERS

Camellia liners should be planted in a well prepared bed or field with a Ph of 4.5 to 6.0. It is very important that they have good drainage and that they not be planted too deep. Under our lath houses, we plant them approximately 14" apart for a 2 year setting. Also, we plant out in the field in 42" rows about 22" apart and cultivate with a tractor. The above is only mentioned as a suggestion as different conditions will take different planting.

	VARIETY	6-8"	8-12"	12-18"
RARE CAMELLIAS GROUP I	Admiral Nimitz	\$.60	\$.72	
	Adolphe Audusson	.60	.72
